I. Scope – Complexity of the problem

What makes this challenge a complex problem? Why hasn't it been solved already? What are the existing solutions and why are they not satisfactory?

II. Relevance – Impact on the SDGs

To what extent does the idea/solution contribute to more sustainable futures? How does it contribute to the SDGs? What trade-offs are there in relation to the SDGs?

III. Deployment – Resources

What resources support the feasibility of the idea? Can you show a prototype or MVP to demonstrate? Are you able to select the right means? Is it technologically feasible?

IV. Deployment - Qualification

Why are you the right team/ person to realize and implement the solution, what qualities do you bring? What do you need to take the next step?
